

## Course ISO/TS 16949:2002 Auditor

### About ISO 16949 series

ISO/TS 16949:2002 is a technical specification which forms the requirements or the application of ISO 9001 for automotive production and relevant service part organizations. It is required by the large automotive industry manufacturers such as Ford (12/14/2006 deadline), GM (12/14/2006 deadline) and DaimlerChrysler (7/1/2004 deadline) and others. It is essentially ISO 9001 with additional automotive specific requirements. Once you implement processes and procedures that comply with the requirements listed in ISO/TS 16949, you can be audited by a third party organization called Registrar such as TUV or UL who will certify your organization to this standard. ISO/TS 16949 is applicable to all suppliers of products and services for the automotive industry. To achieve compliance, you can train employees who will drive the implementation internally, or use a consulting firm that can assist in the training and implementation. Providing training on the basis of the standards for key players (QA and QC personnel) in your organization so that they can understand what it entails, is a good starting point

### Online ISO/TS 16949:2002 Auditor class

- Can be taken from home or at work through the Internet.
- Have "save and exit" features so that you can do it at your own pace
- After registration, there are no time limits, and you have complete flexibility in taking the course around your schedule.
- Use examples and quizzes that give very good exposures on industry related implementation issues.
- Provide excerpts of the Technical Specification ISO/TS 16949:2002, the International Standard ANSI/ISO/ASQ Q9001-2000 (in dark blue) and uses information from ANSI/ISO/ASQ Q9004-2000 to give guidance in implementation of quality systems. Both standards are reprinted with permission of the American Society for Quality (ASQ).
- Use a continuous evaluation method with on-going quizzes to facilitate the information retention. If your final average is equal or greater to 70% you will be issued a **training certificate**. If your final average evaluation is less than 70%, you will have to take a final exam and score above 70% to be issued the training certificate.
